---

Hi Bill and Russ,

I wanted to touch base with both of you on the final mitigation plan for the Upper Clear Creek site that the Port is proposing to do. Back in April, we sent a letter to the tribe and cc'ed you, inviting the tribe to consult with us on the proposal, if such was their wish. We haven't heard back on anything, and it would be helpful if we could either know whether the tribe had issues to discuss, or whether they were comfortable with the proposed project. Can you get back to me on this? I tried phoning earlier today, but wasn't sure if I had the right number, so I am following up with email.

I will be working from a different location tomorrow but can be reached at (b) (6). Thanks again for your continued help in bringing this matter to fruition. I'll look forward to hearing from you.

Best wishes,

Mary Anne
